SOCIAL SCIENCES AND HUMANITIES PROGRAMMES

Universities with a difference.
Both Canadian Military Colleges (CMCs) — the Royal Military College of Canada (RMC) in Kingston, Ontario, and Royal Military College Saint-Jean (RMC Saint-Jean) in Saint-Jean-sur-Richelieu, Quebec, — truly are universities with a difference.

The CMCs offer, amongst other programmes, the Regular Officer Training Plan (ROTP) — a fully subsidized education plan leading to an undergraduate degree and a commission as an officer in the Canadian Armed Forces (CAF). As a ROTP student at a CMC, you will embark on an invigorating journey to become a part of a proud heritage. Officer cadets and naval cadets are enabled to excel by being immersed in an environment that values excellence in academics, physical fitness, second language proficiency and leadership. The CMC environment cultivates self-discipline, self-motivation and mutual respect, and the College Motto — Truth, Duty, Valour — guides staff and students in everything they do.

The education and military experience within the CMCs will provide you with the professional and intellectual skills necessary to assume the responsibilities and meet the demands of leadership in today’s rapidly changing world. A career as an officer of the CAF will offer you experiences and challenges, serving Canada across the country and around the globe.

The Canadian Military Colleges (CMCs) are national universities for educating and developing leaders committed to serving Canada. To achieve this goal, the demands of a CMC education go beyond academic achievement.

For officer cadets and naval cadets (otherwise referred to as cadets) studying under the Regular Officer Training Plan (ROTP) or the University Training Plan - Non-Commissioned Members (UTPNCM), the CMCs degree is based on four interlocking pillars: Academics, Military, Physical Fitness and Bilingualism, each of which is incorporated throughout the formal and informal elements of the CMC programme.

The CMCs teach the importance of character development and a healthy lifestyle through physical fitness. The Physical Education and Athletics Programme helps each officer and naval cadet attain a high level of physical fitness. Earn the skills of a wide variety of team and individual sports, develop a strong proficiency in hand-to-hand combat and aquatic activities, all while maintaining character growth and leadership skill development. This programme is an integral part of the curriculum. The officer cadets and naval cadets must meet the CMC fitness standards to graduate.

Bilingualism reflects Canada’s heritage. As representatives of this heritage, officers are expected to be fluent in both of Canada’s official languages. Upon arrival at a military college, officer and naval cadets complete a second language proficiency evaluation. They are grouped in small classes according to their level of bilingualism. Four to six hours per week of second language training is mandatory up until they achieve a BBB level recognized by the Public Service Commission. An immersion course is also given during the summer.

Studies are at the heart of officer training. All ROTP officer cadets and naval cadets will complete one of the following degrees: Bachelor of Arts (Honours), Bachelor of Arts, Bachelor of Science (Honours), Bachelor of Science, or a Bachelor of Engineering. There are 20 overarching academic programmes that are offered, 19 at RMC and one at RMC Saint-Jean. Many of these programmes can be taken as double Honours, double Majors, Joint Major, or a Major with a Minor or double Minor.

The military pillar develops skills needed by officers to succeed in today’s complex and rapidly changing world. Upon completion of the Basic Military Officer Qualification training, given at the Canadian Forces Leadership and Recruit School, students accepted at one of the CMCs will continue learning the elements of military training during the College’s Orientation Programme.

Officer cadets and naval cadets are given the opportunity to hold leadership positions while at the Colleges and are mentored by military staff and senior students.

For officer cadets and naval cadets studying under the Regular Officer Training Plan (ROTP) — a fully subsidized education plan leading to an undergraduate degree and a commission as an officer in the Canadian Armed Forces (CAF).
ENRICHMENT

RMC provides a wide range of enrichment activities to complement the academic programme. These activities are offered to officers, cadets, and ROTP students and consist of cultural, educational, and recreational opportunities. Some examples include music, art, and language classes, as well as workshops and seminars on various topics. This enriching environment fosters personal and intellectual growth, allowing students to explore their interests beyond the traditional academic curriculum.

SPORTS & RECREATION

RMC is a member of the Ontario University Athletics (OUA), one of four conferences that make up U SPORTS. RMC’s varsity teams compete in a variety of sports, as shown below. RMC’s competitive clubs provide members an enhanced opportunity for training and competition that are otherwise not available as recreational clubs.

Officer and naval cadets who are not members of a varsity team or competitive club must participate in the intramural programme and may be involved in organizing and running intramural events.

For more information and to see a full list of intramural sports and recreational clubs available please visit www.rmc-cmr.ca

ATHLETIC FACILITIES

RMC’s modern athletic facilities cater to a wide variety of sports and activities. The Kingston Military Community Sports Centre houses a 25-metre pool and hot tub, a 200-metre track, a spin room, cardio room, squash courts, a weight room and hardwood courts. There are also tennis courts, soccer fields, rugby pitches, an ice rink, a domed turf facility, a volleyball court, and an ample amount of equipment that provide students with the opportunity to participate in various sports, including windsurfing, canoeing, and kayaking, and a variety of activities.

STUDENT SERVICES

Delivery of student support services is accomplished via the cooperative efforts and partnerships of many internal and external organizations that can act as the first point of contact, and help students either directly, or by referring them to appropriate resources. Students can walk into the College Success Centre for any reason to get support and help.

The Director of the Centre is part of the Canadian Standards Association, working on Mental Health Services and Support standards for post-secondary institutions. The Director coordinates with Public Health in Kingston to create synergy between RMC and the greater community.

Students have access to the following services:

- RMC Success Centre
- Math Help Centre
- Writing Centre
- Academic Accommodations
- Sentinel Programme
- Spiritual Support
- Medical and Dental Services
- Canadian Forces Morale & Welfare Services
- Military Family Resource Centre
- Personnel Support Programmes
- Financial Counselling Services

OFFICER CADET LIFE AT RMC

The campus, rich in history, heritage, and tradition, is located on Point Frederick, a small peninsula near downtown Kingston, Ontario, situated midway between Toronto and Montreal, and only two hours from Ottawa. RMC acknowledges that the land on which it is located is the traditional territory of the Anishinaabe and Haudenosaunee peoples.

DORMS

ROTP students are required to live on campus. Available single rooms are normally allocated to Fourth Year students. Other senior students are allocated single rooms on a space available basis. First Year students are quartered in double rooms. All residences are co-ed. Residence for officer cadets and naval cadets is guaranteed and mandatory. There is no deposit or need to apply.

VISITING RMC

Undergraduate candidates and their families are encouraged to participate in a tour of RMC. Tours are offered on Mondays and Fridays throughout most of the year and reservations are required. Please find the online booking tool at www.rmc-cmr.ca, contact liaison@rmc.ca or call toll free 1-866-762-2072 or 613-541-6000 ext. 6984 to schedule your campus tour.

RMC Saint-Jean ensures officer cadets and naval cadets a seamless transition from high school to university by providing two college-level programmes in Social Science and Science which are closely integrated with the undergraduate university programmes offered at both CMCs.

These two year college-level programmes are offered in both official languages; they extend over four semesters and correspond to CEGEP 1 and 2. The courses are recognized by the Ministry of Education and Higher Education of the province of Québec.

RMC Saint-Jean also offers an undergraduate programme in International Studies.

The RMC Saint-Jean campus is set on a historical site located on the west bank of the Richelieu River, some 40km southeast of Montreal and only three hours from Kingston, ON. Athletic and recreational facilities, along with dining facilities are all located a few steps away from academic facilities and student residences.

All ROTP students are required to live on campus. Residences are co-ed, equipped with common gender rooms and washrooms. Laundry rooms and a lounge are available in each residence.

Athletic facilities

RMC Saint-Jean’s athletic facilities provide officer cadets and naval cadets the opportunity to participate and compete in many different sports. The sports complex includes a 25 yard pool, a spinning room, a weight room, a cardio room, squash courts, an ice rink and hardwood courts. Outside tennis courts, soccer fields, deck hockey and a 400m track are also available. All necessary equipment is made available to train and develop the cadets athletic abilities.

Sports & recreation

Maintaining a healthy lifestyle is a priority for the CAF and this is why physical fitness training and sports is a mandatory part of officer cadet and naval cadet life. The sports programme will develop values such as resilience, determination, respect and team spirit in a stimulating environment, with the support and guidance of strong leaders. Officer and naval cadets may choose to play in competitive teams or intramural sports. The competitive sports component of the programme offers a calendar of events adapted to each discipline that provides officer cadets and naval cadets with opportunities for success and excellence. Student-athletes who play on competitive teams represent RMC Saint-Jean in both civilian and military events.

Some leisure clubs are also available, such as chess, curling, tabletop games, Dungeons & Dragons, gaming, and deck hockey. These clubs may change based on students’ different interests.

Student services

To support students along their studies and to ensure their success in each of the four pillars of the curriculum, RMC Saint-Jean offers a variety of services designed to help them cope with the many challenges they face at the academic, moral, as well as physical and mental health levels.

Upon arrival at RMC Saint-Jean, all officer and naval cadets are mentored by an experienced military team. This team will allow them to learn the ways of the military culture in a healthy and respectful environment.

Personnel Support Program staff work with the military community and several partners to promote the moral and physical well-being of military personnel in their communities. This includes healthy eating and physical fitness programmes provided by the kinesiology team at RMC Saint-Jean. The officer cadets and naval cadets also have access to the Peer Support Group. Members of this group focus on active listening to direct their peers to resources and support services as needed.

Officer cadets and naval cadets have access to the following services:

- Mentorship by experienced military personnel
- Members of the Personnel Support Program
- Peer Support Group
- Chaplains and spiritual guidance
- Academic Advisor
- Director of College Programmes
- Documentary Research Support & Training
- Pedagogical Support Coordinator
- Peer Tutoring Services
analyzing Francophone literature. Students gain an understanding of cultural and social values in the development of societies in today’s world, with particular emphasis on “La Francophonie”. The programme also investigates how sociocultural standards vary from one society to another.

**HISTORY**

History has been described as one of the best possible educations for military leaders. It has the potential to provide officers with an understanding of the different cultures that they will encounter. This programme aims at preparing officer cadets and naval cadets of the CAF, where they will have the opportunity to serve at the international level and work in a variety of culturally diverse environments.

**SECOND YEAR**

**MILITARY AND STRATEGIC STUDIES**

This programme employs a multidisciplinary approach to the study of international relations, strategic management, and military history. It is intended to provide an introduction to national security studies, with an emphasis on the role of the military. The programme is divided into six major fields of study: (a) History; (b) International Relations; (c) Defence and Security Studies; (d) Political Science; (e) Psychology; and (f) Environmental Science.

**POLITICAL SCIENCE**

Courses are multidisciplinary and focus on philosophical, social, political, strategic, and security issues, both domestically and internationally, and their political implications. The programme is divided into six major fields of study: Canadian government, international relations, comparative politics, political theory, public administration, and policy, and geography. The programme focuses on methods of inquiry and political philosophy, and addresses the questions of peace, justice, democracy, and equality.

**PSYCHOLOGY**

The programme provides students with a framework on which to build an understanding of the dynamics of leadership. Emphasis is on field experience, focusing on self-awareness and appreciation of human behaviour; the ability to understand the political and cultural factors that influence the skill to adapt leadership approaches to a variety of circumstances; and the need to reflect continually on one’s values and professional conduct.
for current and future climates, from polar to arid or tropical regions. Courses in the field of the structures, soil mechanics, water resources, transportation, and geomatics, are complemented by other topics of relevance to the Military Engineers trade. A programme highlight is a one-week field school at a Canadian or international location in Third Year.

COMPUTER ENGINEERING

Engineers work with and understand both the hardware and software of computer systems, fusing together electronics and applied computer science. The programme offers elective concentrations in either the Software Engineering or Electronic Systems Engineering aspects. Software Engineering is the application of the design of the new computer-based products and systems. The Electronic Systems Engineering concentration focuses more on the computer hardware design, including studying the application of Electronic and Electrical Systems Engineering to design computer-based systems and the embedding of computer systems in complex products.

ELECTRICAL ENGINEERING

The programme aims to develop mathematical skills, in all levels of technical problems. They work in a team environment, with problem solving skills which are required to tackle today’s complex systems employed throughout the CAF. Students studying in the programme will build their knowledge with the design of electric vehicles and robotics, control and electromagnetic/optical design principles. Students working in this programme also includes courses on Android app development, computational complexity and programming fundamentals, the programme also includes courses on Android apps, computer networks, computer graphics, and artificial intelligence. Graduates are well-equipped to grow in almost every sector of human endeavour. With a solid foundation in mathematics, algorithm analysis, computer networks, communication and software engineering to develop an understanding of analog, digital, and electromagnetic/optical design principles. Engineers work with and understand both the hardware and software of computer systems, fusing together electronics and applied computer science. The programme offers elective concentrations in either the Software Engineering or Electronic Systems Engineering aspects. Software Engineering is the application of the design of the new computer-based products and systems. The Electronic Systems Engineering concentration focuses more on the computer hardware design, including studying the application of Electronic and Electrical Systems Engineering to design computer-based systems and the embedding of computer systems in complex products.

MECHANICAL ENGINEERING

Mechanical Engineers are innovators, focusing on the analysis, design, manufacturing, and maintenance of items of all sizes which extend human physical abilities, from nano-machines to large manufacturing plants. With a solid understanding of mechanics, materials science, control systems, and energy, they possess problem analysis, design, and communication skills, which are required to tackle today’s technical problems. They work in a team environment, with solid knowledge of research within the Physics Department: acoustics and ultrasonics, mechanics, materials science, and space science, which addresses many aspects of the physical sciences, such as mechanics, chemical, and classical modern physics, as well as electromagnetic and optics. Many specialized courses are offered in senior years to cater to the various branches of physics. These courses are mainly related to the three axes of research within the Physics Department: acoustics and ultrasonics, mechanics, materials science, and space science, which includes astronomy and astrophysics.

SPACE SCIENCE

The Space Science programme is a more specialized physics-based degree focused principally on topics related to space mission development and operations, space research and astronomy/astrophysics. In senior years, students are required to complete advanced space-related courses, including orbital mechanics, satellite navigation and applications. In the Honours programme, students take more specialized courses, including mission development and operations, satellite navigation and applications. In the Honours programme, students work as a team to complete a capstone project designing a realistic space mission.
By submitting their application, students are applying for full-time employment with the CAF. The Canadian Military Colleges provide the basis for professional development as future Royal Canadian Navy, Canadian Army, or Royal Canadian Air Force officers. An application to the Canadian Military Colleges is an application to serve Canada as a future officer in the CAF and to receive an exceptional education that provides the leadership skills, academic, linguistic and fitness requirements to lead.

**REGULAR OFFICER TRAINING PLAN (ROTP)**

Under the ROTP, the Department of National Defence (DND) pays for all costs of tuition, uniforms, books, instruments, and other essential fees. Officer cadets and naval cadets are also paid a monthly salary (from which mandatory room, board and mess dues are deducted), undergo military occupation training and, if required, second language training. They will also receive full medical and dental care at no cost. Annual vacation with full pay is granted according to CAF regulations. Students are required to maintain satisfactory academic, military, fitness, and linguistic progression throughout the program. Those who do not maintain a suitable level of academic performance may be permitted to repeat one year at their own expense and, if successful, be reinstated to full pay and allowances.

**Upon successful completion of the ROTP, officer cadets and naval cadets receive a bachelor’s degree in Engineering, Science or Arts and become fit, bilingual officers in the Royal Canadian Navy, Canadian Army, or Royal Canadian Air Force.** 

**Military Career**

Upon successful completion of the ROTP, officer cadets and naval cadets are required to serve a minimum of five years (ten for pilots) after graduation. Students enrolled in the ROTP may request to be released from the CAF prior to the commencement of the second academic year without incurring any obligatory service or financial penalties.

**ROTP STUDENT’S TYPICAL PATH AT ONE OF THE TWO CANADIAN MILITARY COLLEGES**
All students interested in pursuing their studies at a CMC must apply through forces.ca/apply-now and are strongly encouraged to start their application at the beginning of their last year of high school.

The process can take over 6 to 8 weeks, so applicants are encouraged to apply in September or October. While January 31 is the deadline to be guaranteed to be considered for the admission process of completing or have completed secondary school at a university preparatory level (Grade 12 or the provincial equivalent). Applicants are required to have the necessary credits to meet the minimum requirements for the programme in which they are completing secondary education as well as meet the admission requirements for the programme they want to pursue. For admission into First Year, Quebec students enrolled in CEGEP must be completing or have completed the first year of a two-year pre-university programme and will normally be expected to have completed fourteen credit courses.

APPLICANTS ARE EVALUATED ON TWO FUNDAMENTAL CRITERIA:

Medical Potential: The score is based on the assessment of the applicant’s aptitude, personality traits and suitability for the chosen occupation.

Academic Potential: The Admissions Office assesses academic performance by verifying a candidate’s top six recent marks which must include the required prerequisite courses for the applicable degree. Transcripts must include the prerequisite courses for the academic programme of choice. Academic Potential also includes an assessment on time management skills, fitness, and level of bilingualism. ROTP candidates may receive an offer to begin their studies at either RMC or CMC Saint-Jean. Individuals who complete Basic Military Officer Qualification (BMOQ) training in Saint-Jean-sur-Richelieu, Quebec, at the Canadian Forces Leadership and Recruit School (CFLRS) in the summer before they begin their studies, following which they will start at one of the two Colleges. Following a successful first year, students will choose their area of study (Mechanical Engineering, Physics, Officer occupant). Those students choosing the Bachelor of Arts (International Studies) degree programme will continue their education at RMC Saint-Jean while all other Social Science and Humanities, Science and Engineering students will complete their year 2, 3 and 4 at RMC.

GENERAL QUALIFICATIONS

To qualify for admission to CMRC, applicants must:
• Be a Canadian citizen
• Meet the minimum medical standards required for CAF enrolment
• Pass pre-enrolment tests
• Be at least 16 years of age at the time of nomination with parental consent
• Hold the necessary academic qualifications
• Hold a high school diploma, or have completed secondary education as well as meet the admission requirements for the programme they want to pursue. For admission into First Year, Quebec students enrolled in CEGEP must be completing or have completed the first year of a two-year pre-university programme and will normally be expected to have completed fourteen credit courses.

WHERE TO START

First, find an occupation that interests you. The CMC officer cadets and naval cadets have 20 unique and exciting occupations available to them. Explore your options by visiting forces.ca or see the academic programmes and military occupations chart on page 75. Then find a degree programme that interests you. The CMC offers 20 undergraduate degree programmes, some of which are required for specific occupations.

APPLYING IN QUEBEC (DIRECTLY FROM SECONDARY 5)

To be admitted, applicants must meet the following conditions:
• Hold a high school diploma, or have completed or be in the process of obtaining a high school diploma (or the equivalent)
• Pass the Secondary 4 History course
• Pass courses given in the primary language of instruction as well as a Secondary 5 Language course
• Meet entrance requirements of the chosen programme of collegial studies
• Have a mark of 70% in academic requirement courses

SCIENCE PROGRAMME PREREQUISITES

Secondary 5 Chemistry or equivalency
Secondary 5 Physics or equivalency
Secondary 5 Mathematics Science Option (SN) or Technical and Scientific Mathematics Option (TS)

SOCIAL SCIENCE PROGRAMME PREREQUISITES

Mathematics Science Option (SN), Technical and Scientific Mathematics Option, Culture, Society and Technology and Math 426 with a minimum score of 70%
