RIDDLE

🔍 I can get you in trouble if I appear,
Copying others makes me clear.
A shortcut today, a risk you take,
Your own hard work, you should not fake.

❓ **What am I?**_____

Ethical AI & Academic Integrity

Across

[2] Moral principles that guide the responsible use of AI in academia and beyond.

[6] The practice of making AI processes and decision-making understandable to users.

[9] False or misleading information, sometimes generated by AI without intent to deceive.

[11] Using someone else's work or AI-generated content without proper attribution. [13] Adhering to ethical and academic standards when using AI tools.

[14] Informing others when AI-generated content has been used in academic work.

[15] Giving proper credit to sources, including AI-generated content.

Down

[1] Using AI to perform repetitive tasks efficiently without human intervention.

[3] When an AI model generates false or misleading information as if it were true.

[4] The process of checking the accuracy of AI-generated content before use.

[5] AI systems that create new content, such as text, images, or code.

[7] A tendency of AI models to favor certain viewpoints or demographics due to training data.

[8] Deliberately false information, often spread to mislead others.

[10] A subset of AI where systems learn from data without explicit programming.

[12] A reference to the source of information, ensuring academic integrity.
